

Program Day 1

Tuesday, 21 February 2023

Time	Where	What	Title	Session overview	Theme	Speaker(s)
8.00am - 9.00am	North Terrace	Registration opens		Once you have checked in at the registration kiosks, begin exploring The Hive.		
8.00am - 5.00pm	The Hive H	Exhibition and Startup Alley		Our world famous exhibition and Startup Alley will run across the two-day event. Immerse yourself at anytime among some of the world's best operators and inventors in agriculture. Exhibition: Wander through our many partner exhibition stands to discover what's new in agrifood innovation. Startup Alley: evoke ^{AG} Startup Alley features up to 40 local and global startups.		
9.00am - 9.45am	Plenary P	Welcome		<ul style="list-style-type: none"> Introduction by Master of Ceremonies (MC) Welcome to Country Official opening by AgriFutures Australia 		Bryce Ives , MC Kuma Kaaru Cultural Services AgriFutures Australia Chair

This program is subject to change and additional speakers will be added in the lead up to evoke^{AG} 2023 on 21-22 February 2023. The latest program can be viewed on evokeag.com

Version: Monday, 21 November 2022

Time	Where	What	Title	Session overview	Theme	Speaker(s)
9.45am - 9.55am	Plenary P	Opening remarks		Since the inception of evoke ^{AG} in 2019, Elders has supported our mission to help drive innovation and growth in Australia's agricultural industry. Elders has once again renewed its commitment to Australian agrifood innovation, returning as the official Platinum Partner for 2023. Hear from Mark Allison, Managing Director and CEO of Elders, as he discusses Elders' commitment to the next generation of innovations that will continue to spur Australian agriculture into the future.		Mark Allison , Managing Director and CEO, Elders
9.55am - 10.30am	Plenary P	Keynote	One in a "Maverick"	We all want to innovate, but is that enough? What if the pace of innovation isn't fast enough to save us from climate change or worse? Find out how a maverick approach supercharges innovation to another level. Life, food, shelter, and longevity: if you can make it work in the harsh environment of space, there's a good chance that we can make it work on Earth. Surviving on Earth will require a maverick way.	Technology Global investment Global challenges	Scott Amyx , Managing Partner, Astor Perkins
10.30am - 11.00am	The Hive H			Morning tea		
11.00am - 11.20am	Plenary P	Fireside chat	Bringing space down to Earth	Space tech is transforming our world and with it, entire industries. From visualising crop health and informing the management of future automated farms, to understanding human behaviour and planning for critical food shortages. Combining high-resolution satellite imagery data with Artificial Intelligence and Machine Learning has endless applications, especially for agriculture. This fireside chat dares you to look at how space can improve our lives here on Earth.	Technology	Scott Amyx , Managing Partner, Astor Perkins Matthew Gilliham , Director at the Waite Research Institute, University of Ade- laide, and Director, Australian Research Council's Centre for Excellence in Plants for Space Facilitated: Bryce Ives, MC

Time	Where	What	Title	Session overview	Theme	Speaker(s)
11:20am – 11:35am	Plenary P	Keynote	FoodShot: a moonshot for better food	What happens when big money gets behind big ideas? Find out how entrepreneurs, investors and social change agents are using science and technology to answer the big questions and achieve radical change to feed a growing human population safely.	Global investment Sustainability	Victor Friedberg , Founder and Chairman, FoodShot Global
11:35am – 12:15pm	Plenary P	Panel discussion	Going global: who's investing in agribusiness?	Geopolitical tensions. The relationship between inflation and commodities. Emerging markets and industry diversity. We bring together venture capitalists from leading firms across Europe, the US, Asia Pacific and Australia to share their insights on the factors impacting global agrifood tech investment and where the unexpected opportunities for the future may lie.	Global investment	Adam Anders , Managing Partner, Anterra Victor Friedberg , Founder and Chairman, FoodShot Global Matthew Pryor , Co-Founder and Managing Partner, Tenacious Ventures <i>Matthew and Victor will be joined by panellists from European and Asia Pacific VC Funds.</i>
12:15pm – 12:35pm	Plenary P	Panel discussion	Accelerating commercialisation with AgriFutures grow ^{AG} .	Finding world-leading research, technologies and commercialisation opportunities in one easy-to-use location, has always been a challenge – until growag.com. The homegrown solution designed by AgriFutures Australia, is helping connect users from around the world with Australian agrifood innovation, increase deal flow and drive value on-farm through the adoption of game-changing technologies. Here we unpack the need for AgriFutures grow ^{AG} , some of the success stories and why a more collaborative approach is helping accelerate innovation and commercialisation.	Investment Technology	Professor Craig Baillie , Head of School and Dean (Agriculture and Environmental Science), University of Southern Queensland Jane Bunn , Founder and CEO, Jane's Weather John Harvey , Managing Director, AgriFutures Australia

Time	Where	What	Title	Session overview	Theme	Speaker(s)
12:35pm – 1:35pm	The Hive H			Lunch		
1:35pm – 2:15pm	Plenary P	Fireside chat	Cooperative co-operative: a tale of collaboration between industry and innovation	How can making milk without cows benefit Australian dairy farmers? Join the CEOs of Eden Brew and Norco Co-operative to find out how they're working together to create synthetic dairy products to build more resilient supply chains and complement the profit models of farmers in Australia's largest dairy co-operative.	Alternative protein Synthetic biology Supply chain	Jim Fader , CEO, Eden Brew Michael Hampson , CEO, Norco Co-operative
1:35pm – 2:15pm	Breakout room 1 B1	Panel discussion	Reality check: moving beyond sustainability frameworks in agriculture	Australia and New Zealand's land-based agricultural industries have set ambitious sustainability targets for the future. We ask industry leaders to share the realities of their progress beyond frameworks and targets, what keeps them up at night, and how producers can be part of the solution through tangible actions today. <i>This session will begin with a three minute Startup Showcase.</i>	Sustainability	Michael Anderson , Head of Sustainability, GrainCorp Anna Speer , Managing Director, Greenstock Lee Stewart , Head of Corporate Sustainability, Fonterra Jason Strong , Managing Director, Meat and Livestock Australia
1:35pm – 2:15pm	Breakout room 2 B2	Workshop	Data as a second language: understanding what your farm is saying to you	Uber and Airbnb turned two conventional industries on their heads. How did they do it? Using software that allows two applications to talk to each other. Now it's agriculture's turn. Andrew Skinner and Andrew Cooke will show you the possibilities and benefits of connecting data to create new business models and operating efficiencies for producers and companies alike, in what they've coined the 'Internet of Agrifood'. <i>This session will begin with a three minute Startup Showcase.</i>	Technology	Andrew Cooke , Managing Director, Rezare Systems Andrew Skinner , Director, More Than Machines

Time	Where	What	Title	Session overview	Theme	Speaker(s)
1.35pm – 2.20pm	Gilbert room GR	Workshop	Empowering farmers to shape the future of environmental reporting	Science, technology, coupled with an investment in skills and capability, need to be harnessed to empower farmers to shape the future of natural capital management and environmental reporting. This session will consider the innovation needed to enable natural capital to be treated as a factor of production in agriculture and explore the potential benefits and opportunities that can flow from investment in this.	Farming	Daniel Gregg , Principal Economist, Farming for the Future Dr Sue Ogilvy , Program Director, Farming for the Future
Brought to you by Farming for the Future						
2.15pm – 2.20pm Transition time						
2.20pm – 2.55pm	Plenary P	Panel discussion	Digital distraction: making on-farm data work for you	Data can provide insights on everything from optimal irrigation and equipment maintenance to soil fertility, but with a plethora of apps and software solutions, how do producers move from digital distraction to meaningful decision-making? This highly practical session features case studies from producers who've done exactly that to leverage big results on-farm. <i>This session will begin with a presentation from an evoke^{AG} Future Young Leader.</i>	Technology Farming	Luke Chaplain , Nuffield Scholar, SkyKelpie Brad Egan , 2022 Australian Young Innovative Farmer of the Year Hans Loder , Nuffield Scholar, and Vineyard Manager, Penley Estate Fiona Turner , Co-Founder and CEO, Bitwise Agronomy, and Jinglers Creek Vineyard

Time	Where	What	Title	Session overview	Theme	Speaker(s)
2.20pm – 2.55pm	Breakout room 1 B1	Panel discussion	What will it take to satisfy the growing global appetite for protein?	With an expected two billion extra people to feed by 2050, coupled with changing tastes and dietary preferences, there is a growing global demand for more protein, produced more sustainably and from a wider variety of sources. In this session, we bring together diverse voices from across the supply chain to look at how we leverage both traditional and alternative protein sources to deliver on the growing global requirement for protein. Where are the opportunities? What are the constraints? And what are the 'watch outs' for consumers?	Future of Food	Professor Michelle Colgrave , Future Protein Mission Leader, CSIRO David Jochinke , AV Jochinke and Co., and Vice President, National Farmers' Federation Dr Steven Lapidge , CEO, Fight Food Waste Ltd Anthony Stewart , CEO, Thomas Foods International Facilitator: Dr Aparna Venkatesh, Innovation Lead, Southeast Asia & Oceania, Bühler Group
2.20pm – 2.55pm	Breakout room 2 B2	Panel discussion	Startup capital: local vs global	Prior to 2019 there wasn't a single Australian venture capital firm focused on agritech. Today, there are multiple players. In this session we explore two very different experiences - from an Australian company forced to source off-shore funding to expand globally, to an international company seeking local backing to enter the Australian and New Zealand marketplace. Experts from two leading venture capital firms weigh in on what's changed in our investment ecosystem and the realities of securing funding in today's environment.	Investment	Phil Morle , Partner, Main Sequence Ventures Rob Williams , Director, Artesian (Alternative Investments) Saar Safra , CEO and Co-Founder, BeeWise Phil, Rob and Saar will be joined by an Australian agrifood company to share their insights on securing investment.
2.20pm – 2.55pm	Gilbert room G	Workshop	Brought to you by the Commonwealth Bank of Australia	CommBank will join a panel of industry experts and producers to discuss sustainability in agriculture. Delegates will leave the session with a greater understanding of what it all means, where it might be heading and the opportunities to get started.	Sustainability Investment Farming	

Time	Where	What	Title	Session overview	Theme	Speaker(s)
2.55pm – 3.00pm				Transition time		
3.00pm – 3.40pm	Plenary P	Panel discussion	Opportunities in agriculture: the perspective of Indigenous people	Indigenous peoples are the original stewards of the land and with that, the very first agriculturalists. In this session we explore how the modern application of traditional practices is creating market demand for Indigenous products, especially in the food and beverage sector. We also consider the barriers to scale and, if overcome, the potential to transform agrifood value chains and Indigenous communities alike.	Indigenous agriculture	Jacob Birch , Researcher and Academic, Southern Cross University Dr Christine Pitt , CEO Food Futures Company Guy Royal , Guy Royal, Yirector, Tuia Group Facilitated by: Professor Stan Grant Jnr, Vice Chancellor's Chair of Australian-Indigenous Belonging, Charles Sturt University, and Host & Journalist, Q&A
3.00pm – 3.40pm	Gilbert room G	Workshop	The secret sauce: from agritech startup to commercialisation Brought to you by Syngenta	With Syngenta as a provider of plant health solutions and Pairtree Intelligence as a data integrator, together their aligned partnership is adding value to farmers. Here we uncover the key ingredients needed to transform agricultural technology, from startup to fully fledged commercial player.	Investment Technology Innovation Farming	Brett Hoffman , Head of Business Development, Syngenta ANZ Hamish Munro , CEO and Co-Founder, Pairtree Intelligence
3.00pm – 3.40pm	Breakout room 1 B1	Panel discussion	Eyes wide open: who gets the money and who gets the (carbon) credit?	Governments, industries and companies the world over are stepping up their climate commitments, but can carbon credit markets help us meet net-zero targets or do they simply allow emitters to continue to release greenhouse gases? In this not-to-be-missed session, we uncover every angle to ensure you leave informed on the great carbon debate. <i>This session will begin with a presentation from an evoke^{AG} Future Young Leader.</i>	Sustainability Carbon farming	Stuart Austin , General Manager, Wilmot Cattle Co. Dr Nicole Buckley Biggs , Director of Sustainability, AgriWebb Greg Butler , General Manager, South Australian No-Till Farmers Association Dr Rob Waterworth , CEO, FLINTpro Facilitator: Oli Madgett, Co-organiser SA AgriTech Meetup

Time	Where	What	Title	Session overview	Theme	Speaker(s)
3.00pm – 3.40pm	Breakout room 2 B2	Panel discussion	Hello robot: autonomous agriculture	Self-driving tractors, seed planting robots and agricultural drones are all putting new technology and better outcomes in the hands of our producers. We bring together the companies making it happen and the producers using the tech to share what's in the market right now, what's to come, and at what point does autonomous agriculture start to pay for itself on-farm? <i>This session will begin with a three minute Startup Showcase.</i>	Technology	Professor Craig Baillie , Head of School and Dean (Agricultural and Environmental Science), University of Southern Queensland Andrew Bate , CEO, SwarmFarm Robotics Ben Kelly , Production System Manager – Production and Precision Agriculture, John Deere Robert Hardie , Executive Manager – Health and Agriculture, nbn Australia
3.40pm – 4.10pm	The Hive H			Afternoon tea		
4.10pm – 5.05pm	Plenary P	Keynote	By endurance we conquer: a Shackletonian approach to the climate crisis	Environmental scientist, author, adventurer and public speaker Tim Jarvis AM shares lessons on leadership, resilience, teamwork and goal-setting learned from his polar expeditions. Drawing on his personal observations of environmental change in the polar regions and his current focus on rewilding and regeneration, Tim explores humanity's impact on the planet and how individuals and organisations can step up to be part of the solution. <i>This session will commence and close with a Future Young Leader presentation, as well as a presentation by the AgriFutures Researcher of the Year.</i>	Global challenges, Sustainability	Tim Jarvis AM , Environmental Sentient, Author, and Adventurer
5.05pm – 7.00pm		Festival of Food		The Festival of Food is a casual networking function for delegates to see out Day 1.		

Program Day 2

Wednesday, 22 February 2023

Time	Where	What	Title	Session overview	Theme	Speaker(s)
8.00am – 9.00am	North Terrace			Doors open		
8.00am – 5.00pm	The Hive H	Exhibitions and Startup Alley		Our world famous exhibition and Startup Alley will run across the two-day event. Immerse yourself at anytime among some of the world's best operators and inventors in agriculture. Exhibition: Wander through our many partner exhibition stands to discover what's new in agrifood innovation. Startup Alley: evoke ^{AG} . Startup Alley features up to 40 local and global startups.		
9.00am – 9.10am	Plenary P	Welcome		MC welcomes delegates and provides a recap of Day 1 proceedings.		Bryce Ives , MC

Time	Where	What	Title	Session overview	Theme	Speaker(s)
9.10am – 10.25am	Plenary P	Plenary Panel discussion	The collision of the four Cs	World trade continues to be impacted by the Four Cs: climate, COVID-19, conflict and cost. But which changes are temporary, and which are permanent? In this important wide-ranging discussion, our panellists challenge themselves - and the audience - to consider whether these factors will drive collaboration, creativity or catastrophe in the future, and ask which conversations we need to be having as a sector in light of this. <i>This session will be followed by a presentation from an evoke^{AG} Future Young Leader.</i>	Global challenges	Alasdair Macleod , Executive Chairman, Macdoch Group Mary Shelman , Founder, Shelman Group Sam Trethewey , Managing Director, Tasmanian Agricultural Company
10.25am – 10.50am	The Hive H			Morning tea		
10.50am – 11.35am	Plenary P	Panel discussion	Farm to arm fashion: how innovation is driving sustainability on the runway	Socially conscious consumers are increasingly demanding sustainable fashion, driving companies to innovate greener forms of fibre production. Learn how Sea Forest and M.J.Bale are partnering to create net zero clothing – including the world's first carbon neutral three-piece suit; how iconic Australian brand R.M. Williams is integrating sustainability into its supply chain through its 'Regenerative Footprint'; via responsible sourcing of fibres & materials, as well as growing their circular system for boots, including ongoing product takeback, refurbishment and recycling programs.	Sustainability	Sam Elsom , CEO, Sea Forest Jonathan Lobban , Head of Brand, M.J. Bale Angela Winkle , Chief Sustainability Officer, R.M. Williams
10.50am – 11.35am	Gilbert room G	Workshop	Brought to you by Wharf42 and Western Growers	Western Growers members produce over 50% of all North America's fresh produce. They are looking for Australian agritech solutions to help address key challenges around automation, water and the application of biologicals to soil and plants. If you are looking to enter the US market, learn more here.	Sustainability Technology Farming	Ben Barlow , Managing Director, New Edge Microbials Dennis Donohue , Director, Center for Innovation and Technology, Western Growers Peter Wren-Hilton , Founder & CEO, Wharf42

Time	Where	What	Title	Session overview	Theme	Speaker(s)
10.50am – 11.35am	Breakout room 1 B1	Panel discussion	Brand ag	Clean and green is to New Zealand, what the Emerald Isle is to Ireland and what innovation is to Israel. These countries have built brand identities and entire markets on leveraging their unique strengths and stories. This session looks at what Australia can learn from these international powerhouses about how to position our producers and innovators on the world stage to deliver direct benefits across the entire supply chain.	Global challenges	David Downs , CEO, New Zealand Story Group Shifka Seigel , Project Manager, Israel- Australia Chamber of Commerce Mary Shelman , Founder, Shelman Group
10.50am – 11.35am	Breakout room 2 B2	Panel discussion	SynBio: transforming agriculture one cell at a time	From designing crops for fuel production, to creating programmable cells to fight disease, synthetic biology or SynBio is big business. There's also big interest and big backing from pharmaceutical and biotechnology companies. We speak with four SynBio players about advances in the field, the applications and what it might mean on farm in the near future.	Synthetic biology	Natalie Curach , Senior Director Business Development, Ginkgo Bioworks Nick Hazell , CEO and Founder, v2food George Peppou , Founder and CEO, Vow Michele Stansfield , General Manager, Agritechnology Facilitator: Dr Aparna Venkatesh, Innovation Lead, Southeast Asia & Oceania, Bühler Group
11.35am – 11.40am	Transition time					
11.40am – 12.15pm	Plenary P	Panel discussion	Biosecurity: how are we safeguarding our \$100 billion industry target?	As an agricultural industry, we're targeting \$100 billion per annum in farm gate output by 2030. But in the past 12 months, the offshore outbreak of Foot and Mouth Disease in Indonesia and the presence of the Varroa mite on our home soil threatens to derail the sector. We bring together producers, innovators, regulators, and biodiversity experts to look at how we stack up globally on biosecurity threats and if we're doing enough to safeguard our 2030 industry target and the producers who depend upon it?	Biosecurity	Sarah Corcoran , CEO, Plant Health Australia Ryan Higgs , Co-Founder and CEO, Onside Danny Le Feuvre , CEO, Australian Honey Bee Industry Council

Time	Where	What	Title	Session overview	Theme	Speaker(s)	
11.40am – 12.15pm	Gilbert room G	Workshop	Next gen: biomanufacturing for Earth, sustainability and space	Our growing ability to engineer biology with automation, AI and data analytics is driving a biomanufacturing revolution. This wide-ranging session looks at some of the most cutting-edge developments, from space ag's push to enable long term space habitation and sustainability on Earth, to the fermentation advancements driving the wineries of the future, and new processing technology in dry fractionation for plant protein.	Synthetic biology Technology Future of food	Professor Rachel Burton , School of Agriculture, Food and Wine, University of Adelaide Associate Professor Jenny Mortimer , School of Agriculture, Food and Wine, University of Adelaide	
11.40am – 12.15pm	Breakout room 1 B1	Panel discussion	The fringe benefits of on-farm tech	Brought to you by Elders	The application of agritech is often positioned to improve operational efficiency, profitability and sustainability. Industry is now leveraging on-farm data and infrastructure to provide a more robust end-to-end supply chain. In this session, experts from three of Australia's leading agri-corporates discuss the peripheral value drivers that producers should consider in their pursuit of digitising their business. <i>This session will begin with a three minute Startup Showcase.</i>	Technology Innovation	Mark Barber , General Manager, Farmland Agency and Agribusiness Investment, Elders Carmel Onions , General Manager Agribusiness, Commonwealth Bank of Australia <i>Mark and Carmel will be joined by a representative from one of Australia's largest insurance companies.</i> Facilitator: Michael Macolino, Managing Director, SVG Ventures Thrive (APAC)
11.40am – 12.15pm	Breakout room 2 B2	Panel discussion	Turning a blue industry green	The global appetite for sustainably sourced and produced seafood, fishery and aquaculture products has increased. So too, has the focus on finding solutions to overcome some of the challenges associated with aquaculture and seafood operations. In this session we ask industry leaders how they're faring in turning a blue industry green and which innovations are driving to deliver on environmental, social and economic bottom lines. <i>This session will begin with a three minute Startup Showcase.</i>	Sustainability	Lucy Buxton , Director, Ocean Decade Australia Dr Adam Main , General Manager, CH4 Australia	

Time	Where	What	Title	Session overview	Theme	Speaker(s)
12.15pm – 1.05pm	The Hive H			Lunch		
1.05pm – 1.25pm	Plenary P	Keynote	Helping humanity grow	Professional plant breeding over the past 100 years has been the key driver behind delivering enough food to meet the demands of our growing population. Innovative digital technologies are supercharging the power of plant breeding and helping build greater climate resilience, by reducing carbon emissions and using fewer resources. This fundamental goal, to 'produce more with less' is changing our mindsets and how we work in harmony with plants and agriculture.	Technology Future of food	Alexander Tokarz , Head of Group Strategy, Syngenta Group
1.25pm – 1.55pm	Plenary P	Panel discussion	How digital solutions can yield new growth Brought to you by Telstra	Prioritising the health of the environment, the welfare of animals, and producing safe and nutritious food is at the heart of farming. The challenge, however, is finding ways to maximise output and expand into new markets without compromising on those priorities. Could the key to solving this challenge lie in new digital solutions? Join our expert panellists as they discuss the digital innovations helping the industry increase output and enter new markets, while sustainably managing valuable resources.	Farming Innovation Technology	Steven Henderson , Client Partner, Go To Market Partnerships, IBM Robert Mackenzie , Director, Macka's Australian Black Angus Beef Jon Young Flores , Industry Executive Agribusiness, Supply Chain and Retail, Telstra
1.05pm – 1.55pm	Breakout room 1 B1	Panel discussion	The risks and rewards of renewables	As the transition from fossil fuels to renewables gathers pace globally, we bring together different perspectives in this breakout session. From those who've commercialised renewable fuels on a large scale, to the challenges of sustaining biofuels at a local level, our panellists share the challenges and opportunities in the production and application of sustainable fuel sources. <i>This session will begin with a three minute Startup Showcase.</i>	Sustainability	Steven Hobbs , Farm Manager, Yarrock Jennifer Lauber Patterson , Director, Frontier Impact Group Facilitator: Oli Madgett, Co-organiser SA AgriTech Meetup

Time	Where	What	Title	Session overview	Theme	Speaker(s)
1.05pm – 1.55pm	Breakout room 2 B2	Presentation	Workforce Community Trust	Australia's rural industries face increasing community expectations on a range of issues including environmental management, labour workforce conditions, and acceptance of new technologies. Achieving Australian agriculture's \$100b production goal by 2030, requires a pipeline of talented and committed people – the lifeblood of our rural industries. Two major research programs have demonstrated the critical role that community trust in rural industries plays in supporting innovation and growth. This session will present findings from the Community Trust in Rural Industries and Community Perceptions & Worker Experiences projects, with actionable insights and toolkits to nurture our rural industries. <i>This session will begin with a three minute Startup Showcase.</i>	Workforce Sustainability Future of food	Dr Kieren Moffat , CEO, Voconiq
1.55pm – 2.00pm	Transition time					
2.00pm – 2.40pm	Plenary P	Panel discussion	How consumer insights are driving change across the fresh food industry	Understanding what your customers want is critical to any business's success. And in a world as fast paced as ours, staying ahead of the customer curve is paramount. In this session, our panellists share how they're responding to consumer demands for healthy, ethical and sustainable products and the science being developed to verify these claims.	Investment Supply chain Consumer Insights	Professor Rachel Ankeny , School of Humanities, University of Adelaide Tom Rutledge , CEO, HelloFresh ANZ Dr Nina Welti , Trusted Supply Chains Impact Area Lead, CSIRO

Time	Where	What	Title	Session overview	Theme	Speaker(s)
2.05pm – 2.40pm	Breakout room 1 B1	Panel discussion	Exploring alternative avenues to funding	If you can't bootstrap and the venture capital door is closed, what options are open to agrifood tech startups looking to scale? Explore the benefits and challenges of alternative funding opportunities through the likes of commercialisation acceleration grants and crowd funding. Founders will share lessons from the coalface, including real life startups funding war stories, as well as the unexpected upsides of taking the financial roads less travelled. <i>This session will begin with a three minute Startup Showcase.</i>	Investment	Alex Logan , Co-Founder, Cecil Shannon Speight , CEO, Black Box Co. Tony Sinclair , Commercialisation Facilitator, i4 Connect Facilitator: Michael Macolino, Managing Director, SVG Ventures Thrive (APAC)
2:05pm – 2:40pm	Breakout room 2 B2	Panel discussion	One small step for man, one giant leap for agriculture	With plans to establish Australia's first dedicated space manufacturing hub in South Australia, what better location to take a deep dive into the future of agri space tech. With a focus on research and development, potential ground-breaking applications and new ways of working, stargaze with us in this future-focussed session. <i>This session will begin with a three minute Startup Showcase.</i>	Technology	Devon Long , General Manager of ANZ, Regrow <i>Devon will be joined by an industry expert and producer benefiting from the application of space tech on farm</i>
2.40pm – 3.10pm	The Hive H			Afternoon tea		

Time	Where	What	Title	Session overview	Theme	Speaker(s)
3:10pm – 3:45pm	Plenary P	Panel discussion	Onshoring, offshoring and friendshoring: a changing supply chain landscape	Geopolitical tensions, COVID-related constraints and unprecedented supply chain impacts have forced entire industries to reshape how they do business over the past two years. Our panellists share the lessons learned from these experiences, as well as their insights on potential impacts and opportunities across manufacturing models, food security, future trade relationships, carbon miles, and traceability pre and post farm gate. <i>This session will begin with a Future Young Leader Presentation.</i>	Supply Chain	Melissa Fletcher , CEO, Fletchers International Exports Rob Gordon , CEO, SunRice Justin Webb , Co-Founder and CEO, AgriWebb
3:45pm – 4:20pm	Plenary P	Speaker session	Doubling down: insights from the 2022 AgFunder AgriFoodTech Investment Report	Venture capital investors pumped \$51.7 billion into agrifood technologies in 2021; a staggering 85% increase year-on-year. Take a deep dive into these trends with AgFunder drawing on its 2022 Global AgriFoodTech Investment Report and get an early look at what startups and investors can expect from the funding landscape in the year ahead and what producers can keep an eye out for to implement on farm. <i>This session will begin with a Future Young Leader Presentation.</i>	Global Investment	Michael Dean , Founding Partner, AgFunder Sarah Nolet , Co-Founder and General Partner, Tenacious Ventures
4:20pm	Plenary P	Official event close	Closing remarks			John Harvey , Managing Director, AgriFutures Australia
